

Hat size is based on the circumference of the head. In order to determine proper hat size, take a measurement of your head. Using a tape measure, measure the head about one-half inch above the eyebrows where the hat will rest. Be certain that the tape measure is straight, not twisted. Alternatively, a piece of string can be used to circle the head, measuring the length of the string with a ruler. If the measurement is between the set sizes, it may be wise to purchase the larger size.
